QCPR setup

Get the QCPR manikins showing live on the training room TV, about 5 minutes before CPR starts. Then the fixes for the usual faults.

1

Get the kit out

Training room

- [ ] The Education Tablet, charged.
- [ ] The QCPR manikins. Only manikins with hair and a QCPR sticker connect.
- [ ] The training room TV remote.

2

Turn on the TV

Training room TV

- [ ] TV on, then INPUT › Screen sharing.

3

Show the tablet on the TV

Education Tablet

- [ ] Unlock the tablet. Swipe down from the top right › Smart View.
- [ ] Tap Training room TV (or Training room TV 2).
- [ ] Wait 5–10 seconds. Stay on that screen until the tablet shows on the TV.

4

Open the QCPR app

Education Tablet

- [ ] Open the Laerdal QCPR app from the tablet's main menu.
- [ ] The club login should already be saved. If it asks, the login is in the Hub. Never write it on the tablet or on paper.

5

Check the settings

Once per tablet

- [ ] Menu (top left) › Settings › guidelines: ERC 2021.
- [ ] On: session starts on first compression, hand position feedback, too-deep compressions.
- [ ] Off: pre-ventilations. Depth in centimetres, not inches.
- [ ] Number of rescuers: two. The target is a compression fraction of about 80%.

6

Connect the manikins

In the app

- [ ] Training › CPR. The app starts looking for manikins.
- [ ] Press each manikin's chest once or twice until it beeps, then tap Connect.
- [ ] Up to 6 manikins per tablet or phone.
- [ ] Optional: tap Arrange, then press each manikin from left to right so the screen matches the room.

7

Run the 2 minutes

During the session

- [ ] Tap Start session. Each manikin's 2 minutes start at its first compression.
- [ ] Doing DRSAB first? Hands off the chest until CPR starts. Started early? Pause the group › Restart.
- [ ] The overall score is not the only thing that matters. Open Results for depth, rate, recoil, breaths and compression fraction.

8

Fix the usual faults

If something goes wrong

- [ ] Nothing on the TV: check INPUT › Screen sharing, then redo Smart View. Try the other training room TV.
- [ ] Manikin not found: press harder until it beeps. Check it has hair and a QCPR sticker, and that Bluetooth is on.
- [ ] Manikin still missing: it may be connected to another phone or tablet. Disconnect it there (3 dots › Disconnect), or use a second device.
- [ ] More than 6 manikins: use a second tablet or phone.
- [ ] Manikin drops out or won't wake: check its batteries.
- [ ] App asks for a login: the login is in the Hub.
